The City that is hidden in the Barber's Sentence "Boss, here is a perplexing tonsorial problem, which is too hard for me to tackle!" is "Lexington."

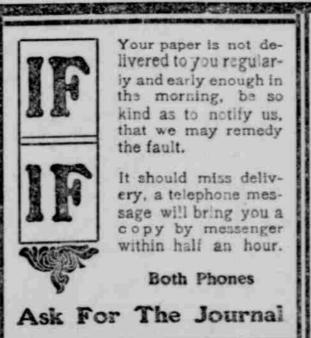

The problem of the Bjcycle Rider who rides a mile in two minutes with the wind and a mile in three minutes against the wind, bothered almost all the puzzle solvers. Most of them averaged the two times and answered that without any wind at all, the rider would go a mile in two and a half minutes. This is not correct. With no wind at all, the rider would go a mile in two minutes and twenty-four seconds. A curious thing about the replies to the Hidden City Puzzle is that although it seemed an extremely easy one, a great majority of the answers were that the hidden city was Boston; yet the word Lexington is very plain. Owing to this fact, comparatively few readers guessed the correct answers.

Five Cash Prizes of \$1.00 are Awarded Each Week to the best, clearest, or most concise answers received, and a puzzle book to the other correct answers.

The puzzle books are just the thing for those who are interested in such matters, and when the other volumes which are to follow are issued, they will make the best collection of puzzles and tricks ever brought together, and as they cannot be procured in any other way, only the clever folks can obtain them. Prizes will be changed from time to time.

I will always be pleased to hear from the young folks and to receive contributions of original puzzfes, mathematical and geometrical curiosities, bright conundrums, etc.
